## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 173-176 are rejected under 35 U.S.C. § 102(b) as being anticipated by Newfield et al (Hereafter, Newfield), "Scatchpad : Mechanisms for Better Navigation in Directed Web Searching ", ACM 1998.

Regarding claim 173, Newfield teaches a method of operating a computer, comprising :

providing a visual display, displaying digital content in a first window on the visual display, the digital content including a hyperlink, providing a graphical interface on the visual display that is operative to effectuate a designation of a hyperlink (i.e., visual display window containing hyperlinks) [see Figs. 1-2]; and

visually generating a plurality of individually selectable user options on the visual display in response to the designation of the hyperlink, including at least one option for performing the non-linking functionality of automatically copying the hyperlink to a second window in a manner that permits the copied hyperlink to be independently activated and processed, and selecting the individually selectable user option of copying the hyperlink to a second window and automatically performing such non-linking functionality of automatically copying the hyperlink

to a second window in response to the selection (i.e., storing pending links in another window) [see Figs 1-2 and Pages 4-6].

Regarding claim 174, Newfield further teaches the method of claim 173 wherein multiple hyperlinks are copied to a second window and where each of the copied hyperlinks can be independently activated and processed (i.e., each pending link can be visisted separately at a later time) [see Pages 6-7].

Regarding claim 175, Newfield further teaches the method of claim 173 where the non-linking functionality further comprises copying any associated graphical elements corresponding to the hyperlink to the second window (i.e., displaying pending links and some associated graphical elements such as colors ...) [see Page 6].

Claim 176 is rejected under the same rationale set forth above to claim 173.

3. Applicants' arguments with respect to claims 173-176 have been considered but are deemed to be moot in view of the new grounds of rejection.

THE PERIOD FOR RESPONSE WILL CAUSE THE APPLICATION TO BECOME  
ABANDONED (35 U.S.C. § 133). EXTENSIONS OF TIME MAY BE OBTAINED UNDER
